RE: Letter of Recommendation – Farr Builder’s, LLC.

To Whom It May Concern,

I am the Landscape Architect / Project Manager for the 902 Civil Engineering Squadron at Randolph AFB, Texas. Farr Builders has just completed the new “Remote Piloted Technical Training Campus” project, a total reconstruction of the exterior grounds which included several individual disciplines of construction. They were professional and took a very proactive role in the process. There were only a few changes due to unforeseen site conditions and they were dealt with in a very proactive and professional manner. They turned in all submittals in a timely manner. They were responsive to all of Randolph’s oversight and knowledgeable of the task at hand. The project design was executed and completed on time without error.

Upon completion of the RPTTC project, the 902 Civil Engineering Squadron has received numerous compliments on the newly constructed area. I look forward to working with Farr Builders on future upcoming projects.

Respectfully,

John Howry
Landscape Architect
